Lab: Assignment-2: Part-B: Sample Output   Inbox   x

Compiler Design
to bcc: me

Hope you all are utilizing the holiday period, and have started working on the Part-B.

None of you have approached me for any questions/clarifications for lab/theory. I am taking it as a positive sign that you are able to follow...

Pl find attached the sample inputs and outputs (3+3) for the assignment. Just note the contents of the output.
The exact messages and format of the output can be different.

(1) ST.{c, out}: dump at the end of parsing.
  - the earlier reductions not shown.
  - ignore the entry for main, which is also an identifier.
(2) duplicate.{c, out}: error for duplicate declaration
(3) undeclared.{c, out}: error for using a variable without declaration

Remember that the key thing is, identifying WHERE (i.e. which productions) to put the actions.
Also, it can be done in a number of ways; main thing is to be able to understand and defend...

Arun
